Education

University of Adelaide

Bachelor of Computer Science (Advanced)(Honours), Major in Artificial Intelligence

Adelaide, SA

2024 - Expected 2027

- GPA: 6.5/7.0. Coursework includes Data Structures and Algorithms, Systems Programming, Computer Systems, Object-Oriented Programming, and Software Design.

Experience

CMV Group

Data Solutions Engineer

Adelaide, SA

Apr 2024 - Present

- Developing an AI document-to-audio workflow that orchestrates content ingestion, LLM summarisation, and text-to-speech generation for concise executive briefings.
- Built a retrieval-augmented Outlook email-drafting add-in using prior mailbox context and an Azure Functions backend.
- Architected an incident-reporting platform using Plumsail SharePoint forms, JavaScript, Azure Functions REST APIs, SQL Server, and Azure Blob Storage.
- Optimised employee share-registry processing through batch execution, increasing efficiency by 1,500%, and developed serverless workflows for automated ATO reporting.

Microsoft

Software Engineering Intern, Azure Client Tools

Sydney, NSW

Dec 2025 - Feb 2026

- Implemented end-to-end OpenTelemetry instrumentation in Python for the Azure CLI AI-assisted command handler.
- Captured request latency, token consumption, outcomes, errors, and response-quality signals for reliability, performance, and cost analysis.
- Created Grafana dashboards for service health and model-usage trends, supporting bottleneck diagnosis with production telemetry.

Word Lawrie

Lead Developer and Producer

Adelaide, SA

Jan 2023 - Feb 2024

- Led a four-person team to design, build, and release a 2D word game using Unity and C#.
- Negotiated a non-exclusive Coolmath Games licence, resulting in a 7,000% increase in monthly active users.

Project

Syntactic

Unity, C#, Azure DevOps

Independent project

2026 - Present

- Building a roguelike word-combat game with staged validation, damage previews, enemy intents, data-driven script effects, and a custom retro-terminal interface.
- Implemented modular combat state, letter-cache and script-process runtimes, RAM-based resources, and reusable UI components for a vertical-slice prototype.

Competitive Programming and Achievements

- **Jane Street ETC (Feb 2025):** 2nd overall out of 16 teams.
- **RSP x CPC Competition (Mar 2025):** 2nd overall out of 38 teams.
- **Adelaide University Competitive Programming League:** 6th overall in the 2025 league.

Technical Skills

Languages: Python, C#, C++, JavaScript, SQL, Bash

Cloud and backend: Azure Functions, REST APIs, OpenTelemetry, SQL Server, Azure Blob Storage, SharePoint, Power Platform

AI and developer tools: RAG, LLM application workflows, text-to-speech, Grafana, Git, Azure DevOps, Unity
